## THE WOOD CARVING DISCS & THE “WORLD’S SMALLEST CHAINSAW”

Scott Ferguson | OEM Sales Manager

*Lancelot® 4" blade with  
Oregon 25F chain*

*Lancelot® 4" blade with  
Oregon 72DXF chain*

*The Squire® 3" blade  
utilizes both 72DXF and  
25F Oregon chains.*

In my role as Blount's North American OEM Sales Manager, I have the privilege of working with many of our customers who use and install Blount's chains, bars, sprockets, blades and more on the equipment and tools they produce. For the past five years, our Product Spotlight articles have provided insights into the forestry and lawn & garden products we manufacture and sell. I would now like to share with you some stories of our OEM (original equipment manufacturer) partners and their products.

King Arthur's Tools (KAT) is a small, family owned business located in the Florida panhandle. KAT offers a unique range of carving products that have been developed through the years to cut and shape a variety of materials. Quality and safety are key attributes for their patented products. More than 20 years ago KAT's founder, Arthur Aveling, worked with Blount's Bob Pemberthy, to develop and qualify their flagship blade, the Lancelot® 4" blade, which is used on disc and angle grinders. The Lancelot blades and their little brothers, the Squire® 3" blades, are available with two different Oregon "full house" chains – 1/4" pitch 25F and 3/8" pitch 72DXF and come with various arbor hole dimensions to fit a variety of grinders models.

As you know, Blount produces chains and bars for the biggest harvesters and chain saws in the world. You may not know that we are also the original equipment chain on the smallest chain saw in the world – Merlin®.

Merlin2® “The World’s Smallest Chain Saw” is a miniature long neck angle grinder that utilizes an 8 tooth loop of Oregon 25F – indeed making it the smallest chain saw application that we know of! The Merlin2 also has a variety grinding attachments available making it a versatile tool for many different cutting and grinding requirements.

KAT tools are used by wood carvers around the world. Below are a few examples of their skill and craftsmanship.

To learn more about King Arthur's Tools and see demonstration and pictures of dozens of additional works, visit the KAT website at [www.katools.com](http://www.katools.com).

So whether you are harvesting timber, cutting firewood, pruning the urban forest, mowing your yard or detailing your next woodcraft project, Blount has the quality products to **Help Our Customers Get Their Job Done Right.** ■
